

Ages 4 to 5 years
LEVEL 3

Kidvive Fun & Learn Activity School is an online learning platform designed for children aged 2 to 6 years. Our school offers a carefully structured curriculum across four levels: ECD (2-3 years), Play (3-4 years), Nursery (4-5 years), and KG (5-6 years), focusing on the developmental needs of young learners. Each level is designed to provide children with a strong foundation in key academic areas while making learning engaging and enjoyable.

In the ECD level, we emphasize parental involvement, guiding parents on how to teach their children essential skills in motor development, communication, and early cognitive abilities. The goal is to create a strong foundation at home that supports children's early learning.

At the Play level, children begin learning alphabets, words, tracing, and rhymes while also exploring basic math and science concepts. The curriculum is designed to keep children engaged and curious, offering subjects like Bangla, English, Math, Storybooks, and Coloring, all taught in a fun and interactive way.

The Nursery level builds on these skills by introducing sentence formation, expanding vocabulary, and diving deeper into intermediate science concepts. Children are also encouraged to develop their critical thinking and problem-solving abilities through subjects like Bangla, English, Math, and Storybooks.

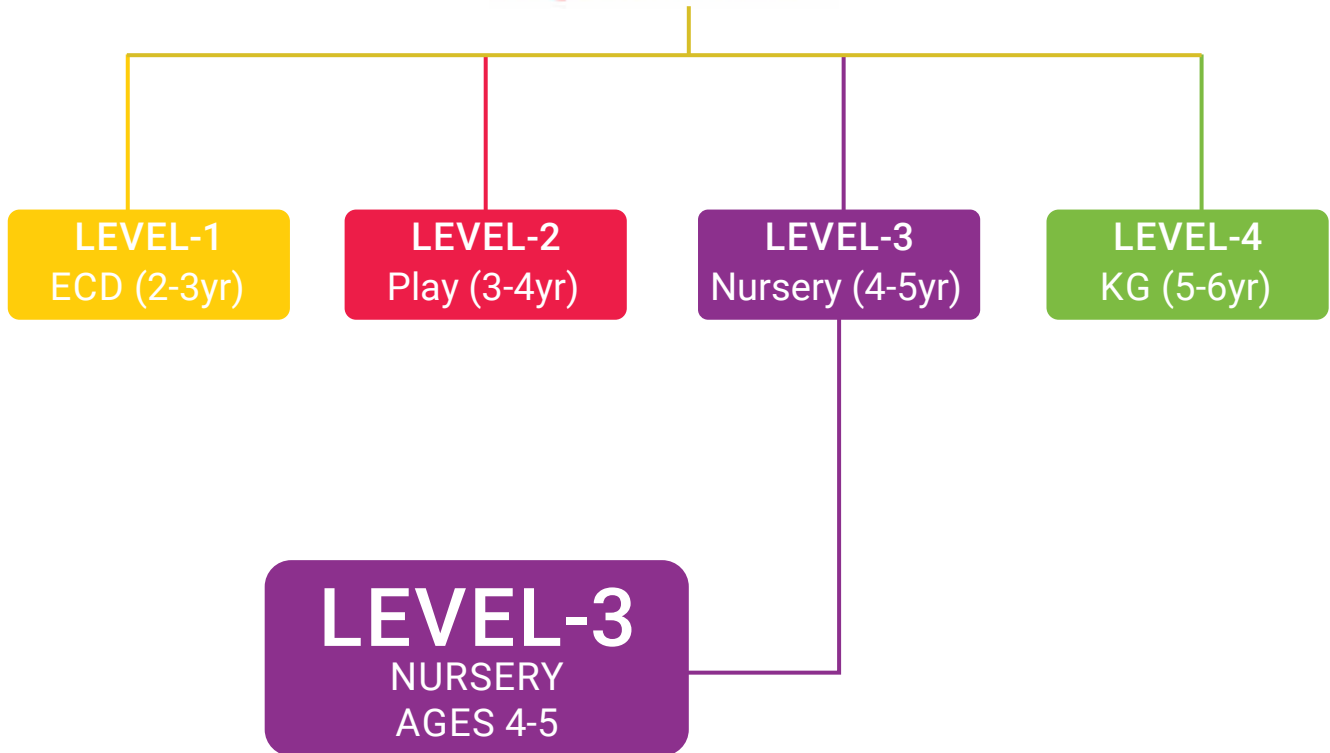

In the KG level, children refine their sentence-making, continue learning math and science, and work on writing skills with fill-in-the-blank rhymes. This level focuses on preparing children for formal schooling, giving them the necessary tools to succeed in a school environment.

At Kidvive Fun & Learn Activity School, we combine interactive learning and engaging activities with a focus on parental involvement, ensuring that children receive a well-rounded education. Our goal is to make learning enjoyable while providing children with the skills they need for future academic success.

Fun, Learn & Grow

The Nursery level focuses on expanding vocabulary, forming basic sentences, and continuing rhymes memorization. Kids start learning intermediate science concepts and advance in subjects like Bangla, English, Math, Storybooks, and Coloring Books. This level bridges the gap between basic learning and more structured education.

Fun, Learn & Grow

About Our Program

Nursery (Level 3) Ages 4-5

The Nursery level builds upon the Play level by introducing more advanced language skills, basic sentence formation, and an extended vocabulary. At this stage, children are encouraged to form simple sentences using the words they have learned, helping them improve communication skills. They also continue with rhymes memorization, strengthening their language abilities and rhythm recognition. In addition to language skills, this level introduces intermediate science concepts, allowing children to develop a deeper understanding of their surroundings. They begin exploring nature, weather, and basic experiments to foster curiosity and logical thinking. Children at this stage expand their Bangla skills by learning new words, forming sentences, and understanding rhyming patterns. In English, they build on vocabulary and start writing short phrases. Math concepts become more structured, including number sequences, simple addition, and identifying patterns. Science lessons introduce topics such as animals, plants, and the environment, encouraging hands-on exploration. Storybooks at this level include longer and more meaningful stories to strengthen reading comprehension, while coloring activities help refine artistic and motor skills.

By the end of the Nursery level, children gain the confidence to express themselves in simple sentences, understand early math concepts, and engage in exploratory learning, preparing them for more advanced education.

Learning Outcome

Social & Emotional Skills

Routine Building

Scientific Thinking & Inquiry

Environmental Awareness

Confidence Building

Nurturing Creativity

Building Brain Power

Fun, Learn & Grow

Weather and Seasons

The weather changes every day! Sometimes it is sunny, sometimes it rains, and sometimes it is cold and snowy.

Bangladesh has six seasons, and each one has its own special weather.

- **Summer** – The weather is very hot, and the sun shines brightly. Many delicious fruits, like mangoes and jackfruits, grow in this season.
- **Rainy Season** – The sky is often cloudy, and it rains a lot. Rivers and ponds fill up with water.
- **Autumn** – The rain decreases, and the sky looks clear and beautiful. White kash flowers bloom in the fields.
- **Late Autumn** – The weather becomes cooler, and farmers harvest paddy.
- **Winter** – The temperature drops, and mornings are foggy. People wear warm clothes and drink hot tea.
- **Spring** – Flowers bloom, and the weather is neither too hot nor too cold. It is known as the "King of Seasons."

Every season in Bangladesh is unique and makes nature beautiful in different ways.

আবহাওয়া প্রতিদিন বদলায়। কখনো রোদ থাকে, কখনো বৃষ্টি হয়, আবার কখনো ঠান্ডা ও তুষারপাত হতে পারে।

বাংলাদেশে ছয়টি ঋতু আছে, এবং প্রতিটি ঋতুর নিজস্ব আবহাওয়া ও বৈশিষ্ট্য রয়েছে।

- **গ্রীষ্ম** – এই সময় আবহাওয়া খুব গরম থাকে, আর সূর্য অনেক তেজী হয়। আম, কাঁঠালের মতো সুস্বাদু ফল পাওয়া যায়।
- **বর্ষা** – আকাশ মেঘে ঢেকে যায়, আর অনেক বৃষ্টি হয়। নদী-নালা পানি দিয়ে ভরে ওঠে।
- **শরৎ** – বৃষ্টি কমে যায়, আর আকাশ পরিষ্কার হয়ে ওঠে। মাঠে সাদা কাশফুল ফোটে।
- **হেমন্ত** – আবহাওয়া ঠান্ডা হতে শুরু করে, আর কৃষকরা ধান কাটে।
- **শীত** – ঠান্ডা পড়ে, আর সকালগুলো কুয়াশাচ্ছন্ন থাকে। মানুষ গরম কাপড় পরে আর গরম চা পান করে।
- **বসন্ত** – ফুল ফোটে, আর আবহাওয়া খুব সুন্দর হয়, না বেশি গরম, না বেশি ঠান্ডা। এটিকে "ঋতুর রাজা" বলা হয়।

বাংলাদেশের প্রতিটি ঋতুই বিশেষ এবং প্রকৃতিকে ভিন্নভাবে সুন্দর করে তোলে।

Exploring Water

Water is all around us! We drink it, play with it, and see it in rivers, lakes, and the rain. Water can be found in three forms: liquid (flowing water), solid (ice), and gas (steam or vapor).

Fun Ways to Explore Water:

- **Floating and Sinking** – Some things float on water, like a leaf, while others sink, like a stone.
- **Hot and Cold Water** – Ice feels very cold, but warm water feels nice and cozy.

Preview version for copyright and timestamp record only.

Licensed under CC BY-NC-ND 4.0 – No commercial use or modifications allowed.

© 2025 Md Abdullah Al Mamun.

- **Absorbing Water** – A sponge soaks up water, but a plastic cup does not.
- **Water in Nature** – Rain, rivers, oceans, and lakes are all different ways we see water.

Water is important for all living things. Let's have fun exploring it!

পানি আমাদের চারপাশে আছে! আমরা এটি পান করি, খেলাধুলা করি এবং নদী, লেক ও বৃষ্টির মাধ্যমে দেখি। পানি তিনটি রূপে পাওয়া যায়। তরল (বয়ে চলা পানি), কঠিন (বরফ), এবং গ্যাস (জলীয় বাষ্প)।

পানির মজার কার্যক্রম:

- **ভাসা ও ডোবা** – কিছু জিনিস পানির উপর ভাসে, যেমন একটি পাতা, আর কিছু ডুবে যায়, যেমন একটি পাথর।
- **গরম ও ঠান্ডা পানি** – বরফ খুব ঠান্ডা, কিন্তু গরম পানি আরামদায়ক লাগে।
- **বরফ গলানো** – পানিতে বরফ মিশ্রিত হলে নতুন নতুন মনোরম বরফ তৈরি করা যায়।

Light and Shadows

Light helps us see the world around us. It comes from the sun, lamps, candles, and flashlights. When light hits an object, it can create a shadow.

Fun Ways to Explore Light and Shadows:

- Making Shadows – Stand in the sun and see your shadow on the ground.
- Shadow Shapes – Use your hands or toys near a light to make different shadow shapes.

Preview version for copyright and timestamp record only.

Shadows are fun to play with, and light helps us every day.

আলো আমাদের চারপাশের জিনিস দেখতে সাহায্য করে। আলো আসে সূর্য, ল্যাম্প, মোমবাতি এবং টর্চলাইট থেকে। যখন আলো কোনো জিনিসের ওপর পড়ে, তখন ছায়া তৈরি হয়।

আলো ও ছায়া নিয়ে মজার কার্যক্রম:

- ছায়া বানানো – রোদের নিচে দাঁড়ালে তোমার ছায়া মাটিতে দেখা যাবে।

Light and Shadows

দিন ও রাত – সূর্য দিনের আলো দেয়, কিন্তু রাতে আমরা বাতি ও চাঁদের আলো দেখি।

Exciting Science Activity Workbook for Kids!

This Science Activity Workbook is packed with fun, hands-on activities that spark curiosity and encourage young minds to explore the wonders of science. Through experiments, puzzles, coloring, and interactive challenges, kids will learn about nature, space, the human body, and more in an engaging way. Designed to develop critical thinking and problem-solving skills, this book makes learning science exciting and enjoyable. Let's explore, experiment, and discover the magic of science!
